

CONTENTS

- 3 Smooth Path Planning for Autonomous Vehicle**
Lubomir Uher
- 15 Three Dimensional Laser Cutting for Motor Car Body Parts**
Domenico Appendino
- 25 Diagnosis of Structural Damage Using Advanced Optimisation Techniques**
Cristinel Mares, Romualdo Ruotolo and Cecilia Surace
- 35 Equilibrium Configurations of a Large Multi-Hinged Space System**
Michelle Lavagna and Amalia Ercoli Finzi
- 47 Variable Displacement Hydraulic Motor Driven Actuation Systems for Efficient Secondary Flight Controls**
G. Jacazio

next number scheduled titles:

High Deformation Strain Gauge for non Conventional Robotics
W. Franco, D. Maffiodo, A. Manuello Bertetto

On the Gyroscopic Stabilisation of a Single Track Vehicle: Free Control Response when running Straight ahead
A. Baldi

Adaptive Control of a Large Space Structure using Lattice Filters
F. Bernelli-Zazzera, L. Dozio, P. Mantegazza

Assessment of Real Contact area in metallic interfaces: a comparison between Finite Element and ultrasonic results
M. Ruggiu, M. Pau

Electrical flight controls feasibility study for aircraft models
P. Maggiore
