

CONTENTS

- 3 Mobile System Motion Based on Potential Field Method**
Danica Janglová
- 9 Optimum Design and Testing of Mechanisms for Two-Finger Grippers**
O. H. Penisi, G. Carbone and M. Ceccarelli
- 21 Influence of Real Gas Behaviour on the Optimisation of Hydro-Pneumatic Accumulator Design**
P. Maggiore
- 27 Tolerances for Measuring**
G. Podda
- 35 Frequency Analysis of Phonocardiograms for Recognition of Degenerative Phenomena in Heart Bioprostheses**
E.M. Zanetti and P.M. Calderale

next number scheduled titles:

The Synthesis of a Mechanism with Bars for a Three Fingers Gripper with High Precision of Gripping

Horia Panaitopol, Constantin Udrea, and Daniel Băcescu

Vibration Suppression using Reconfigurable Co-ordinate Velocities

CR. Ashok Kumar, Anindya Ghoshal, Mannur Sundaresan, Mark J. Schulz and Meldon Human

A Lobed Seal Analysis under High Range Pressure

G. Belforte, A. Manuello Bertetto, L. Mazza

Analysis and Testing of Composite Stiffened Panels with Impact Induced Delamination

U. Icardi

Automotive Magnesium Alloy Castings as Substitute of Steel

G. Guerci and C. Mus
