

## CONTENTS

3 **The Synthesis of a Mechanism with Bars for a Three Fingers Gripper with High Precision of Gripping**

*Horia Panaitopol, Constantin Udrea and Daniel Băcescu*

**Measurement of RMS Rroughness by Means of Ultrasonic Waves**

*Massimiliano Pau*

**Inverse Dynamics of Aircraft by Numerical Optimisation Methods**

*Franco Bernelli-Zazzera, Gerlando Cappello, Paolo Mantegazza*

**Analysis and Testing of Composite Stiffened Panels with Impact Induced Delamination**

*U. Icardi and G. Zardo*

**Automotive Magnesium Alloy Castings as Substitute Of Steel**

*G. Guerci and C. Mus*

***next number scheduled titles:***

Vibration Suppression using Reconfigurable Co-ordinate Velocities

*CR. Ashok Kumar, Anindya Ghoshal, Mannur Sundaresan, Mark J. Schulz and Meldon Human*

Optoelectronic Equipment for Tracking and Adaptive Control of some Minirobots

*Daniel Băcescu, Horia Panaitopol, Mihai Daniel Băcescu and Lucian Bogatu*

Mechanical Transmissions for Electrical and Diesel-Electrical Locomotives

*G. Roccati and D. Botto*

Structural Modifications and Passive Control of Thin Plates through Permanent Magnets

*Bruno A. D. Piombo, Giovanni Visconte, Elvio Bonisoli*

High Deformation Strain Gauge for non Conventional Robotics

*W. Franco, D. Maffiodo, A. Manuello Bertetto*
