

CONTENTS

Direct Lunar Descent Optimisation by Finite Elements in Time Approach

Massimiliano Vasile and Amalia Ercoli Finzi

Principle of Cat-Turn Motion and Realisation of Cat-Turning by a Robot with Vertebrate-Type Backbones Driven by Rubber Actuators

Takashi Kawamura, Kazuo Yamafuji, Kazuo Tanaka and Takayuki Tanaka

Modeling and Control for a Two-Link Manipulator

Tsuyoshi Hori, Kazuo Tanaka, and Kazuo Yamafuji

Contact Analysis and Wear in Two Pneumatic Reciprocating Piston Seals

A. Manuello Bertetto and L. Mazza

Numerical and Experimental study of Load carrying cords-rubber interface in timing belts

A. Manuello Bertetto M. Ruggiu and A. Tessa

next number scheduled titles:

Smooth Path Planning for Autonomous Vehicle

L. Uher

Variable Displacement Hydraulic Motor Driven Actuation Systems for Efficient Secondary Flight Controls

G. Jacazio

Diagnosis of Structural Damage Using Advanced Optimisation Techniques

R. Ruotolo, C. Mares and C. Surace

Three Dimensional Laser Cutting for Motor Car Body Parts

D. Appendino

High Deformation Strain Gauge for non Conventional Robotics

W. Franco, D. Maffiodo, A. Manuello Bertetto

Editor in chief:
Direttore responsabile: Prof. Ario Romiti
